

Appointment Book Pro

Check out these great new features:

Week at a glance

Easily seen the entire week schedule on one screen for any view created by resource or provider.

Improve Scheduling Efficiency with Customize Views

Create new views with the scheduler by all providers, a single provider or just a group of providers. Create a view with all resources or specific resources. Even better, create all these views and switch to and from them with a click of a mouse. Customized views also illustrate provider start and end times on the scheduler, making it easy to schedule appointments by a single provider, group of providers, a single resource, or a group of resources.

Increase Productivity with Appointment Templates

Use templates to designate a block of time for high production appointment. This will ensure that the patients with significant dental work are receiving the appropriate response and care they need. You may also use these appointment templates to designate a time to exclude new patients, or completely prevent appointments during the time allotted for a staff meeting or vacation.

Automatic E-mail Appointment Reminder

Use automatic e-mail reminders to reduce the amount of no shows and reduce the staff's time with appointment reminder calls. With a click of a button, send hundreds of appointment reminders to your patients who have scheduled appointments. This e-mail reminder system uses your own Internet service with standard SMTP e-mail.

Increase and monitor productivity with goals

Improve office productivity by quickly creating daily goals. Monitor the progress with the monthly view of productivity with each day's goal graphed right on the calendar.

Appointment Time Analysis report

Use the new time tracking features to know how long your patients have been waiting services, how long they have been in the operatory, or monitor how late patients are arriving to their appointments. This will also help with patient satisfaction and provider performance.

Enhance Scheduler Security

Each view has specific security build in to allow each users to view only the created scheduler screens specified for that user.

Improve Patient Privacy

Remove all patients name from the scheduler to ensure privacy for all patients.

Block an Entire Day

With the day off, easily block out days where the entire office will be closed. This will mark the entire schedule as grey and give a warning anytime an appointment is attempted to be booked on that day.

Mark specific provider time for each appointment

Designate the specific time within an appointment that the provider or hygienist to be with the patient.
